EDUCATION

Covenant University

Ota, Nigeria

B.Sc. Computer Science

Expected June 2028

- Coursework spans programming fundamentals, algorithms and data structures, and computing systems.

Rainbow College

Surulere, Lagos

West African Senior School Certificate (WASSCE)

2018 – 2024

- Achieved A1 grades in Mathematics, Further Mathematics, Physics, and Computer Studies (WASSCE 2024).
- Selected to represent the school at the Mathematics Olympiad (SS2).
- Active member of the STEM Club and LEGO Robotics Club throughout secondary school.

EXPERIENCE

VDT Communications Ltd.

Lagos, Nigeria

Intern

August – September 2025

- Rotated across four departments — IT, Network Servicing, Customer Service, and Field Engineering — at a leading Nigerian broadband and telecommunications provider.
- Designed and analysed Entity Relationship Diagrams (ERDs) to support system development in the IT department.
- Performed IP-based diagnostics, including latency checks and packet-loss analysis, to resolve client connectivity issues; assisted with network maintenance and troubleshooting.
- Supported field engineers in the installation, servicing, and maintenance of IT and networking infrastructure.
- Invited to return for a second internship in July – August 2026.

Jagun Associates

Lagos, Nigeria

Office Assistant (estate management firm)

School holidays, ongoing

- Assists with client records, property documentation, and general office operations during holiday periods.

SOFTWARE PROJECTS

NetPulse — ISP Performance Tracker — *Python, Flask, SQLite, Chart.js* (github.com/Tobilion/netpulse)

- Built a system that logs internet speed, latency, packet loss, and outages over time and visualises uptime and congestion patterns in a web dashboard — applying IP-diagnostics skills from the VDT internship.

Dream Kick — 3D Football Game — *JavaScript, Three.js, PWA* (github.com/Tobilion/dream-kick)

- Built a browser-based 3D football game with live playable 11v11 matches, AI opponents, and ball physics — every texture and asset generated in code at runtime; installable as an offline PWA.

StudyFlash — Spaced Repetition Flashcards — *React, Node.js, SQLite, PWA* (github.com/Tobilion/StudyFlash)

- Built a full-stack flashcard app for students with SM-2 spaced-repetition review, streak and mastery tracking, CSV/Anki export, and offline use with automatic sync-back.

Habitline — Habit Tracker — *JavaScript, Canvas, PWA* (github.com/Tobilion/habitline)

- Built a dependency-free habit tracker with streak tracking, a GitHub-style activity heatmap, per-weekday scheduling, and JSON export/import.

Football Manager Simulator — *React, Vite, Tailwind CSS* (sport-sim-three.vercel.app)

- Built and deployed a club-management simulation game featuring squad tactics, match scheduling, and a database-driven match engine.

Football Bet Simulator — *React, Vite, Tailwind CSS* (football-bet-simulator.vercel.app)

- Developed a virtual-bankroll betting simulator with simulated live odds, bet placement, and performance-history tracking.

InsightFlow — Data Analysis Utility — *Python, PySide6, Pandas*

- Created a desktop data-analysis tool with a guided wizard interface, real-time financial data retrieval, and automated data cleaning.

Additional projects (duplicate-file analyser, log analyser) at github.com/Tobilion.

SKILLS & INTERESTS

- **Technical:** JavaScript/TypeScript, React, Python, Tailwind CSS, HTML/CSS, Git & GitHub, Vite
- **Certification:** Project Management (online certificate course)
- **Interests:** Consumer technology and gadgets, football simulation games, mathematics and problem-solving puzzles
